The WIŚNIOWSKI swinging door is a simple solution in garages with limited possibilities.
ADVANTAGES

SAFETY
- Modern structural arrangement and proven manufacturing technology guarantee the safe use of the door. Door frames and door leaf are made of closed galvanised sections.
- The door is provided with many accessories that facilitate its safe use: door leaf stop, foot, hinge restrictor and two-point latch-type bolting system in each door leaf.

CUSTOM-MADE PRODUCTION
- It is possible to manufacture a door of this type in any size, with limits only in regard to technical requirements. Doors are available in a few versions: single leaf or double leaf, with or without glazing, and with symmetrical or asymmetrical leaf division.
- In the case of large size doors, it is worth considering building additional walkthrough doors in the garage door leaf. This will facilitate communication in case of frequent garage use.

EXTRA SPACE IN YOUR GARAGE
- If you decide to choose a swinging door, you will be able to use maximum space in the garage. An installed swinging door does not require any free space inside the garage.
- Owing to the wide range of available sizes and no door headroom required it is possible to install these doors in practically every garage with enough driveway space. This door performs well especially in renovated garages and gives them a new look.

COMPLETE OUTFIT
- As with other WIŚNIOWSKI garage door types, the swinging door is equipped with all elements necessary for correct installation and functioning.
- The door is provided with a complete assembly kit adapted to standard installation conditions.
SINGLE AND DOUBLE-LEAF DOOR – SAFETY

SPECIFICATION

**Low price guarantee**

Double leaf doors are conventional garage doors available through WISNIEWSKI. The application of simple and proven solutions guarantees low prices and reliable operation.

Hinge restrictor protects door leaf against being forced open.

Door leaf stop controls door leaf motion so as not to let it open too far.

SIMPLE DESIGN GUARANTEES

EASY INSTALLATION

Swinging doors are offered in a wide range of sizes, and they constitute the most economical solution. They are used in homes, production plants and service facilities.
Foot
protects an open gate against uncontrolled closing.

Bolted connections
guarantee the durability of the whole structure, which is made of galvanised steel sections.

Door version with thermal insulation
may be ordered to improve garage’s thermal insulating power.

Steel sheet

Foamed polystyrene 20-40 [mm]

PVC Panels

Self-locking bolts
installed in four points (at door leaf top and bottom) protect against door being opened by unauthorised persons.
Properly matched wood-effect colours may emphasise the warmth of the home.
GARAGE DOOR DESIGNS

Maximum functionality will be ensured by Swinging Garage Door

Practical design, proven manufacturing technology and immediate availability guarantee full satisfaction after purchase. Available versions of the door: with one or two leaves.

COLOUR LIST

Standard colours in swinging door
- White, RAL 9016
- Grey, RAL 7016
- Olive green, BTX 4702
- Brown, RAL 8014
- Brick red, BTX 2702
- Silver, RAL 9006

- Golden oak
- Walnut

Doors in dark colours are not recommended for use in highly sunlit situations. Colours and gloss levels shown in this material shall be considered approximate only.
The WISNIOWSKI side door which matches the garage door highlights the building’s aesthetics and constitutes a practical solution.
ADVANTAGES

ALUMINIUM DOORS
- The WIŚNIOWSKI aluminium passage doors available to order may have the same design, colour and filling as sectional or roller garage doors. As a result they form harmonious combination.
- Depending on thermal insulating power requirements, door frames are made of profiles with a thermal partition (so-called warm) or without thermal partition (so-called cold).
- Additional options including lock with class C anti-burglar insert, axe-type three-point double door bolt or pin protecting against the door being forced open increase the owner’s sense of security regarding undesired visits.

STEEL DOORS
- The WIŚNIOWSKI steel passage doors are available with the same design, colour and filling as overhead or swinging garage doors. They are provided with the same anticorrosive systems as those used in these garage doors. This allows one to obtain the effect of full harmony and to ensure many years of comfortable use.
- The WIŚNIOWSKI steel doors are designed mainly for garages (as an additional entrance), for basements, utility rooms and heating plants. They suit all of them perfectly.
- They may be used both as internal or external doors. Depending on thermal insulating power requirements, the doors are available with or without thermal insulation, and in versions with glazing or with ventilation grates.
